CONDITIONERS

maratem

Maratem

M801 Stabilized 56% Fast-Dissolving Granular Chlorine

- Broad spectrum disinfectant used for disinfection of pool water.
- Fast-dissolving 56% organic chlorine compound with cyanuric acid.
- It is effective against bacteria, fungi and algae in pool water.
- Prevents the formation of algae by oxidizing organic pollution.

Code	7902151	/	7905430
Weight (kg)	25.00	/	10.00
Units-Case	1	/	1

Maratem

M802 Stabilized 90% Slow-Dissolving Granular Chlorine

- Broad spectrum disinfectant used for disinfection of pool water.
- Slow-dissolving 90% organic chlorine compound with cyanuric acid.
- It is effective against bacteria, fungi and algae in pool water.

Code	7902152	/	7905431
Weight (kg)	25.00	/	10.00
Units-Case	1	/	1

Maratem

M803 Unstabilized 70% Fast-Dissolving Granular Chlorine

- Broad spectrum disinfectant used for disinfection of pool water.
- Fast-dissolving 70% inorganic-based chlorine derivative which does not contain stabilizer.
- It is effective against bacteria, fungi and algae in pool water.

Code	7903384	/	7905432
Weight (kg)	25.00	/	10.00
Units-Case	1	/	1

Maratem

M806 Anti-Algae Chlorine Tablet

- Broad spectrum disinfectant used for disinfection of pool water.
- It is effective against bacteria, fungi and algae in pool water.
- With its 3-in-1 tablet form, it both protects the pool against microorganisms, prevents algae formation and keeps the pool clear.

Code	7903368
Weight (kg)	25.00
Units-Case	1

Maratem
M810 pH Increaser

- Keeps the pH value in the desired range.
- Easily dissolved in water.
- Also used for increasing alkalinity in waters with low alkalinity.

Code	9225610
Weight (kg)	15.00
Units-Case	1

Maratem
M811 Sulfuric Acid Based pH Reducer

- Odorless.
- No corrosion risk when used in the recommended dosage.

Code	9225611
Volume (L)	20.00
Weight (kg)	26.20
Units-Case	1

Maratem
M812 pH Reducer

- Sodium bisulfate-based product used for reducing the pH level of the pool.
- No corrosion risk when used in the recommended dosage.

Code	9225612
Weight (kg)	25.00
Units-Case	1

Maratem
M820 Anti-Algae Agent and Disinfectant

- QAC-based liquid disinfectant.
- Prevents the growth of algae caused by UV rays of the sun in the pool water.
- Ensures rapid clarification of pool water.
- Provides more effective use by boosting the disinfectant effect of chlorine.
- It has bactericidal and algicidal effect in pool water.

Code	9225613
Volume (L)	20.00
Weight (kg)	20.00
Units-Case	1

Maratem
M821 Anti-Algae Agent and Disinfectant-Non-effervescent

- Prevents algae formation in regular use, destroys existing algae.
- Provides more effective use of chlorine by boosting its disinfectant effect.
- It has bactericidal and algicidal effect in pool water.
- Clarifies pool water as it also contributes to disinfection balance of pool water in regular use.
- Facilitates filtration by coagulating the particles suspended in water thanks to the active ingredients in its formulation.

Code	9225614
Volume (L)	20.00
Weight (kg)	20.00
Units-Case	1

Maratem
M823 Concentrated Water Clarifier

- Keeps small particles suspended in the pool water in the filter by coagulation.
- Prevents turbidity in the evening hours when the pool is used the most and clarifies pool water.
- Increases the performance of pool water disinfectants thanks to the structure of the product and helps disinfection.
- Keeps algae and microorganisms in the filter.

Code	9225617
Volume (L)	20.00
Weight (kg)	21.70
Units-Case	1

Maratem
M824 Precipitant

- Allows the particles in the pool water to coagulate and subside to the bottom of the pool and removed with pool sweeper.
- Very effective even in low dosages.
- It should be applied when the pool is closed; machines should be shut down after one round of application and the water should be left to rest and precipitate.

Code	9225618
Volume (L)	20.00
Weight (kg)	24.20
Units-Case	1

Maratem
M825 Fast Precipitant

- Allows the particles in pool water to coagulate and subside to the bottom of the pool and removed with pool sweeper.
- It is a polymeric chemical.
- Very effective even in low dosages.
- It should be applied when the pool is closed; machines should be shut down after one round of application and the water should be left to rest and precipitate.

Code	9225619
Volume (L)	20.00
Weight (kg)	22.20
Units-Case	1

Maratem
M826 Hardness and Ion Binder

- Eliminates the hardness and metal ions in the structure of freshwater taken into the pool.
- Prevents coloration caused by metal ions in pool water.
- Prevents hardness-induced scaling in pool surface and filtration system.
- Prevents the turbidity caused by calcium salts in pool water.

Code	9225620
Volume (L)	20.00
Weight (kg)	22.30
Units-Case	1

Maratem
M827 Concentrated Alkaline Reducer

- A chemical containing inorganic acid, complexing and corrosion inhibitors.
- Used as pH and alkalinity reducer in pool water.
- It is recommended to be used in pools with alkalinity higher than 120 ppm.
- Direct contact with metal surfaces should be prevented.

Code	9225621
Volume (L)	20.00
Weight (kg)	27.50
Units-Case	1

Maratem
M828 Winter Care Product

- A chemical used for off-season conditioning of pool water.
- Prevents damage caused by scale, algae, and external agents in the off-season.
- Maintains the good appearance of the pool water during the winter.
- Contains ion immobilizer and anti-algae raw material.

Code	9225622
Volume (L)	20.00
Weight (kg)	21.60
Units-Case	1

Maratem
M829 Filter and Surface Cleaner

- Used for cleaning the filter and pool surfaces.
- Dissolves the residue of scale, mineral, and organic matter.
- It is not corrosive as inorganic acids used for the same purpose.
- Practical and economical as it is powder.

Code	9225623
Weight (kg)	25.00
Units-Case	1

Maratem
M876 Fan Coil Tablet

- A solid product in tablet form to prevent the residue and bad odors in fan coil units. Provides long-term usage as it dissolves slowly.
- It does not cause corrosion in the system as it does not contain chlorine compound.

Code	9226537
Volume (L)	0.30
Weight (kg)	50
Units-Case	20

Maratem
M878 Biocide for Drinking Water,
Process Water and Tap Water

- A chlorine-containing liquid product used to combat microorganisms and prevent corrosion and accumulation in drinking water and tap water systems.

Code	9226526
Volume (L)	20.00
Weight (kg)	22.00
Units-Case	1
